8 0 % A F U E M U L T I - S P E E D G A S F U R N A C E

When you buy an EVEREST 80% AFUE Multi-Speed Furnace, you are purchasing long-lasting comfort at a good price. EVEREST 80% AFUE Multi-Speed Gas Furnaces are designed to provide you with years of quiet, trouble-free service—and high-efficiency performance that means significant cost savings for you.

EVEREST 80% AFUE Multi-Speed Gas Furnaces are manufactured with quality components that you can rely on. These features include a quiet, corrosion-resistant induced draft blower motor and a multi-speed direct-drive circulating blower to reduce the sound levels common in other furnaces. The unit has an energy-saving Hot Surface Ignition System and integrated controls with diagnostics for further reliability.

Plus, the performance of its high-quality aluminized-steel tubular heat exchanger is guaranteed with a **Lifetime Limited Warranty** that specifies that for the original owner of the unit, if the heat exchanger fails at any time after installation, the owner will receive a new heat exchanger free!

Better yet, if the heat exchanger fails during the first 10-years of ownership, the original, registered homeowner will receive a new, equivalent furnace for free! The war-

ranty reverts to a 20-Year Heat Exchanger Limited Warranty for subsequent owners. Additionally, the unit is protected by a 5-Year Limited Warranty on all functional parts.

**When installed as part of a Home Comfort System including an EVEREST furnace and qualifying air cleaner, this unit qualifies for A.B. May's exclusive 10-Year Platinum Priority Plan.*

Ask your A.B. May Comfort Consultant for details.

(The Platinum Priority Plan coverage requires annual preventive maintenance and filter changes. There is a charge for this service.)

80% AFUE MULTI-SPEED GAS FURNACE

So, where do the savings come in? Your new multi-speed furnace's 80% AFUE rating means that 80 cents of every \$1.00 of heating energy expense warms your home. Some older central heating systems rate at 60% AFUE, meaning only 60 cents of the gas burned contributes to heating. The remaining 40 cents is lost energy—wasteful and expensive. The savings possible with your 80% AFUE Multi-Speed Gas Furnace over time mean real dollars that stay in *your* pocket, not the utility company's.

Average Yearly Heating Costs*

80% AFUE: \$2,193

60% AFUE: \$2,924

A new **EVEREST 80% Gas Furnace** could save you up to 25% on your heating bills when compared with older units, assuming new and previous units are sized to provide the same output capacity.

When installed with an EVEREST high efficiency heat pump, the EVEREST comfort system can cut the annual costs of heating and cooling your home by over 50%!

* Costs determined using the Energy Star® savings calculator provided by the DOE and EPA. These figures are for comparison purposes only; actual costs will vary according to personal use habits, square footage, location, how the unit is installed, the construction of your home and the area of the country in which you live.

Finally, EVEREST 80% AFUE Multi-Speed Furnaces feature a heavy-gauge, wrap-around insulated steel cabinet and durable baked enamel finish that will stand the test of time.

- Aluminized-Steel Tubular Primary Heat Exchanger
- Quiet, Efficient Hot Surface Igniter
- Powder Coat Paint Finish
- Insulated Cabinet
- Corrosion-Resistant Vent Blower
- Electronic Ignition Control
- Multiple-Speed Blower
