

Engineered for quality and comfort.

9 5 % A F U E 2 - S T A G E , V A R I A B L E - S P E E D G A S F U R N A C E

When you buy an EVEREST 95% AFUE 2-Stage, Variable-Speed Gas Furnace, you are purchasing long-lasting comfort at a good price. EVEREST Variable-Speed Gas Furnaces are designed to provide you with years of quiet, trouble-free service—and high-efficiency performance that means significant cost savings for you. Plus, your EVEREST 95% AFUE Variable-Speed Furnace may make you eligible for up to a \$200 in tax credits offered through the Energy Policy Act of 2005.

EVEREST 95% AFUE 2-Stage, Variable-Speed Gas Furnaces are manufactured with quality components that you can rely on. These features include two-stage heating and a variable-speed circulating blower that provides the ultimate in home comfort and energy efficiency. The variable-speed blower works to keep temperatures consistent at all times, eliminating heat stratification from floor-to-ceiling and room-to-room. The unit is multi-position to fit any application, has an energy-saving Hot Surface Ignition System, and has integrated controls with diagnostics for further reliability.

Plus, the performance of its high-quality aluminized-steel tubular heat exchanger is guaranteed with an unbelievable **10-YEAR UNIT REPLACEMENT LIMITED WARRANTY**: if the furnace's heat exchanger fails during the first 10 years after installation while in the possession of the original owner, the owner will

receive a new, comparable EVEREST furnace for free. After the 10-year period, the unit reverts to a **Lifetime Limited Heat Exchanger Warranty**, one of the strongest warranties in the industry. The warranty reverts to a **20-Year Heat Exchanger Limited Warranty** for subsequent owners. Additionally, the unit is protected by a 5-Year Limited Warranty on all functional parts. Finally, EVEREST 95% AFUE Variable-Speed Furnaces feature a heavy-gauge, reinforced, fully insulated steel cabinet and durable baked-enamel finish that will stand the test of time.

**When installed as part of a Home Comfort System including an EVEREST furnace and qualifying air cleaner, this unit qualifies for A.B. May's exclusive 10-Year Platinum Priority Plan. Ask your A.B. May Comfort Consultant for details.*

(The Platinum Priority Plan coverage requires annual preventive maintenance and filter changes. There is a charge for this service.)

95% AFUE 2-STAGE, VARIABLE-SPEED GAS FURNACE

So, where do the savings come in? Your new variable-speed gas furnace's 95% AFUE rating means that 95 cents of every \$1.00 of heating energy expense warms your home. Some older central heating systems rate at 60% AFUE, meaning only 60 cents of the gas burned contributes to your home's heating. The remaining 40 cents is lost energy —wasteful and expensive. The savings possible with your 95% AFUE 2-Stage, Variable-Speed Gas Furnace over time mean real dollars that stay in *your* pocket, not the utility company's.

Average Yearly Heating Costs*

95% AFUE: \$1,842
60% AFUE: \$2,924

A new **EVEREST 95% Gas Furnace** could save you up to 37% on your heating bills when compared with older units, assuming new and previous units are sized to provide the same output capacity.

When installed with an EVEREST high efficiency heat pump, the EVEREST comfort system can cut the annual costs of heating and cooling your home by over 50%!

* Costs determined using the Energy Star® savings calculator provided by the DOE and EPA. These figures are for comparison purposes only; actual costs will vary according to personal use habits, square footage, location, how the unit is installed and the construction of your home. The additional savings that will be realized through the use of this furnace's variable-speed blower are not included in this calculation.

Plus, at 95% AFUE, your variable-speed furnace meets the high-efficiency standards of the Environmental Protection Agency's Energy Star Program initiative.

And about those tax credits... The Energy Policy Act of 2005 provides a tax credit of \$150 for consumers purchasing a furnace with an energy-efficiency level of 95% AFUE or higher. And if the furnace has a variable-speed blower motor, you may be eligible for an additional \$50 tax credit. These tax credits are available for furnaces purchased between Jan. 1, 2006 and Dec. 31, 2007. Talk to your tax professional about EPACT tax credits or visit www.energytaxincentives.org for more information.

FEATURES

- Aluminized-Steel Tubular Heat Exchanger
- Energy-Saving Hot Surface Ignition System
- Two-Stage Gas Valve
- Stainless-Steel Recuperative Coil
- Variable-Speed Blower
- Integrated Furnace Control with Diagnostics
- Heavy-Gauge, Reinforced, Fully Insulated Steel Cabinet
- Corrosion-Resistant Vent Blower

The variable speed blower will operate

around the clock providing quiet and continuous air filtration and circulation, operating at a fraction of the cost of most systems.

EVEREST air conditioning and heating equipment is offered exclusively by A.B. May Company
